

Fig.03
Basic Schematic view
of Ad Hoc Network
between Tracy PODS or Tracy
Protect with User Mobiles.

[01] Tracy and Tracy Protect when on, will open communication for a range of 500m radius through a Ad Hoc Network.

[02] Ad Hoc Networks are wireless hotspots which are deployed with- out the need for any fixed infrastructure using DHCP (Communication Protocol)

[03] Multiples devices could connect with the temporary Ad Hoc Network.
